

case study

Client	Dale Street
Partnership	Regenerate - Rossendale BC Groundwork Pennine Lancashire
Duration	14 weeks
Completion	2009
Value	£200,000

www.hambling.co.uk

contract

To create a usable space for residents to enjoy within a conservation area.

description of work carried out

The existing back street was unmade, littered, overgrown and dog fouled

Works involved clearing the existing back street, re-surfacing using grey flags with concrete sett detailing and drainage channels installed to help with drainage.

The back street alley was gated with decorative hand forged gates and railings to discourage dogs, children and anti social behaviour.

Finally, timber raised planting beds were created for the residents.
